📚 Education

Sri Sivasubramaniya Nadar College of Engineering **Chennai, India**
B.E. Computer Science and Engineering, 8.22 GPA 2017 - 2021
Coursework: Data Structures and Algorithms, Artificial Intelligence, Machine Learning, Operating Systems, Computer Networks, DBMS, OO Design, Software Engineering

💼 Experience

Citi **Chennai, India**
App Dev Programmer Analyst 2 July 2026 - Present
- Worked on migration and modernization of Apache Camel monolith to **Java, Spring boot** microservices, exposing REST APIs utilizing GenAI tools like **Devin** and **Github Copilot**.
- Implemented an API from scratch to determine the eligibility of payment transactions for adjustments.

Infosys **Chengalpattu, India**
Associate Consultant June 2025 - July 2026
- Worked on migration and modernization of old application to **Java, Spring boot** based microservice, exposing REST APIs.
- Implemented bug fixes on **Java, Spring batch** applications.
- Worked on migration of Angular based frontend application to **React** utilizing GenAI tools like **Github Copilot** for reduced development time.

athenahealth **Chennai, India**
Member of Technical Staff Dec 2023 - Aug 2024
- Worked on enabling cross environment data transfer of customer data in an internal portal using **Java**, React.
- Worked on creating automated tests for frontend using **Java**, Selenium.
- Created a new API from scratch, implemented the spec, included authentication functionality and worked on the API end-to-end using Perl.
- Worked on monitoring and implementing bug fixes.

Optum Global Solutions **Hyderabad, India**
Software Engineer Sep 2021 - Dec 2023
- Created multiple micro-services using **Java** and **Spring Boot**, for implementation of REST APIs that validate providers, members and their policy's active coverage.
- Deployed the services in **Azure** as Container Apps with key vault integration.
- Improved the performance of member validation API by 13% using **GraphQL** and Trie.
- Implemented asynchronous logging for APIs to log events to **Splunk** and **Kibana**.
- Created a scheduler using **Java** to check and alert expiration of **Kafka** certificates of all environments.
- Implemented custom **AI** based validations using **Azure OCR** for auto rejection of invalid claims.
- Developed a key API with encryption to allow business teams access claim submissions.
- Improved CI/CD by creating test automation of forms using **Java** and Selenium covering various business use cases.
- Created forms using AEM from scratch with complex business logic and compliance with accessibility standards.

🖐️ Skills

Java, Spring Boot, SQL, React, AEM Forms, Selenium, Cucumber, Perl, HTML, CSS, JavaScript, Git
